## EDUCATION

### BSc. Computer Science

Ghulam Ishaq Khan Institute • Topi, Swabi • 2025

## EXPERIENCE

### Web Developer

Kreative Ally

July 2025 - Present, Pakistan

- Develop responsive and user-friendly web applications using **React**, **HTML**, **CSS**, and **JavaScript**, ensuring performance and cross-device compatibility.
- Created and refined interactive prototypes using **Figma** and **WebFlow**, enhancing UI/UX consistency across projects and reducing design-to-development turnaround by 20%.
- Conduct QA testing, debugging, and code reviews to maintain high-quality standards and smooth deployment processes.

### Frontend Development Intern

Internee.pk

Mar 2025 - May 2025, Pakistan

- Engineered an interactive restaurant platform with **React** and **JavaScript**, featuring an animated digital menu that improved user engagement across mobile and desktop.
- Translated **Figma** prototypes into polished, reusable front-end components, accelerating design-to-development turnaround by 75%.
- Partnered with teammates through **Git** and **GitHub**, coordinating feature rollouts and maintaining a fast, iterative development cycle.

### AI/ML Web application Intern

Mission-Critical Communication LLC

July 2024 - September 2024, Pakistan

- Collaborated on an OCR project as a part of a national project to enhance text extraction from medical forms, ensuring high quality pre-processed training data for the model.
- Trained a transformer-based OCR model, achieving an impressive 86% improvement in text recognition accuracy.
- Developed frontend page for the application that ran on custom cleaned dataset, processing over 300 medical forms.

## PROJECTS

### CryptoEngine

- Designed and developed a responsive cryptocurrency analytics platform for web and Android using **Flutter** and **Python**.
- Integrated real-time data processing, predictive modeling, and sentiment analysis to visualize market trends effectively with up to 93% accuracy.
- Built a scalable backend architecture and optimized data flow to support continuous analysis and seamless performance across platforms.

### E-Commerce Data Pipeline

- Designed and implemented a data pipeline integrating **Hadoop** for storage, **Spark** for data processing, and **Snowflake** for analytical workloads.
- Processed and transformed large-scale e-commerce user behavior data to extract meaningful insights and improve data accessibility.
- Ensured the reliability of the pipeline by implementing robust data validation and optimizing overall workflow efficiency.

### Tourbud

- Developed and tested a tourism application with a responsive UI, robust backend, and recommendation system.
- Reduced backend response time by 30% through performance tuning and database query optimization.
- Integrated Google Maps APIs, enhancing location accuracy and reducing GPS navigation errors.

## INVOLVEMENT

### Director Outreach

Team Swift • June 2022 - June 2025

- Led outreach initiatives to build partnerships with universities, organizations, and industry professionals to expand the team's network and visibility.
- Organized and managed communication campaigns to attract sponsors, collaborators, and event participants increasing turnouts by 50% every year.
- Increased social media engagement by over 40% through targeted content strategies and consistent community interaction.
- Represented the organization in external meetings and events, strengthening relationships and enhancing Team Swift's public presence.

## SKILLS

JavaScript, React, Python, C/C++, SQL, HTML5, CSS, Flutter, Dart, TypeScript, RESTful APIs, Git, Selenium, Postman, Figma, WebFlow, Android Studio, UI/UX Design, Quality Assurance, User Testing, Data Annotation, Machine Learning, Model Optimization, Agile Development, Technical Documentation, Communication, Collaboration, Problem Solving, Adaptability, Time Management
